

# CAN YOUR BUSINESS STAY OPEN IF YOUR NETWORK GOES DOWN?

## TAKE A DEEPER LOOK.

SonicWALL® network security and data protection solutions are built to keep your business up and running by ensuring network availability, secure transactions and access to important data. Intelligently designed, all SonicWALL solutions are also affordable and easy-to-use.

SonicWALL network security appliances keep your network connection up by enabling an automatic failover to either a wireless broadband cellular network or a dial-up phone network if your wired connection goes down. These network security appliances have deep packet inspection capabilities which provide critical network protection from malicious threats such as viruses, worms and Trojans. SonicWALL's solutions also secure the transmission of your customer data and with SonicWALL Global Management System, you can provide unified security policy management and reporting which addresses regulatory PCI mandates. SonicWALL's backup and recovery solution ensures you can easily and quickly recover lost customer data with a click of a mouse.

SonicWALL solutions keep your business applications running, so you can focus on what matters...your business. To learn more about SonicWALL retail solutions, visit [www.coretek.co.uk](http://www.coretek.co.uk).
